Sumagung 2 G1 no.2 Kelapa Gading, North Jakarta, Jakarta, 14240, Indonesia

Final-year Informatics Engineering student specializing in full-stack web development. Enthusiastic about technology and innovation, with a strong interest in integrating AI and machine learning into projects. Dedicated to continuous learning and delivering practical, cutting-edge software and AI-driven solutions.

Work Experience

Programmer Internship

Feb 2025 - Aug 2025

Matthew Christian Susanto | AKR Office Tower, Jl. Panjang No.5 8th Fl, RT.11/RW.10, Kb. Jeruk, Kec. Kb. Jeruk, Kota Jakarta Barat, Daerah Khusus Ibukota Jakarta 11530

I collaborated with software development and testing teams to design and develop scalable, high-performance custom software solutions tailored to client and company needs, coordinated with stakeholders to align on product goals, and created thorough documentation for maintenance and future improvements.

- Quiz Game Application: Built an interactive quiz game for internal company events using React and Laravel with a MySQL database.
- Sales Data Management System: Developed a web application to manage and track sales activities using PHP (vanilla) and jQuery with a MySQL database.
- Meeting Room Booking System: Created a digital solution to streamline meeting room reservations using Laravel (PHP) and jQuery with a MySQL database.
- Authored comprehensive technical documentation to ensure efficient system maintenance, seamless upgrades, and long-term scalability.

Projects

E-Commerce Website

Aug 2024 - Sep 2024

This project uses React for the front end and Flask for the back end. This website implements REST API for communication between the front end and back end, as well as JWT (JSON Web Tokens) for user authentication and authorization.

Stock Prediction Using Linear Regression

May 2024 - Jul 2024

This project is a final assignment for the Programming Language course. This project uses machine learning to predict stock prices based on historical data. The project includes steps such as data preparation, model training, price prediction, and comparison and visualization of results.

Math Master Education Games

Sep 2023 - Dec 2023

In this project, my team and I created a math game using Java that has a login and registers feature and plays the game by choosing the answer to the given problem. The player will get a reward upon finishing each level.

Hope House Foundation Website

Sep 2024 - Dec 2024

I created a landing page website for Hope House Foundation, a non-profit organization. The website contains information about the organization and its activities as well as how to donate to the organization.

Core Skills

Full-Stack Web Development, Database Design & Optimization (MySQL),
RESTful API Development & Integration, Responsive UI/UX Implementation,
Object-Oriented Programming, Version Control (Git, GitHub/GitLab), Testing & Debugging,
AI & Machine Learning Integration (basic projects), Problem-Solving & System Design,
Software Development Lifecycle (SDLC) & Agile Methodologies (Scrum, Kanban)

Education

Esa Unggul University

Sep 2022 - Present

Bachelor Informatics Engineering
GPA: 3.79

SMAN 45

Jan 2019 - Dec 2022

High School MIPA

Languages

English *(Intermediate)*, **Indonesia** *(Native or Bilingual)*

Interests

Web Development, Software Engineering, Artificial Intelligence & Machine Learning, Blockchain & Decentralized Applications
